

WaveForge Thermal

Physics-guided local neural growth with independent solver authority

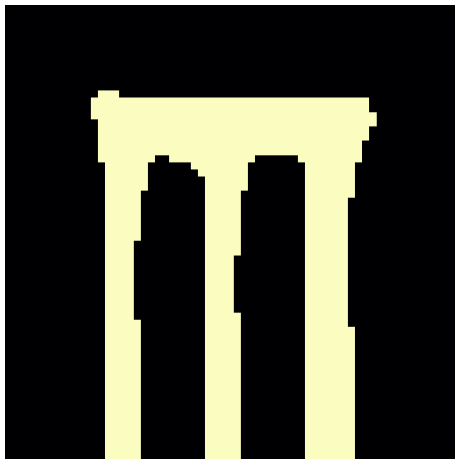

1 Physical task

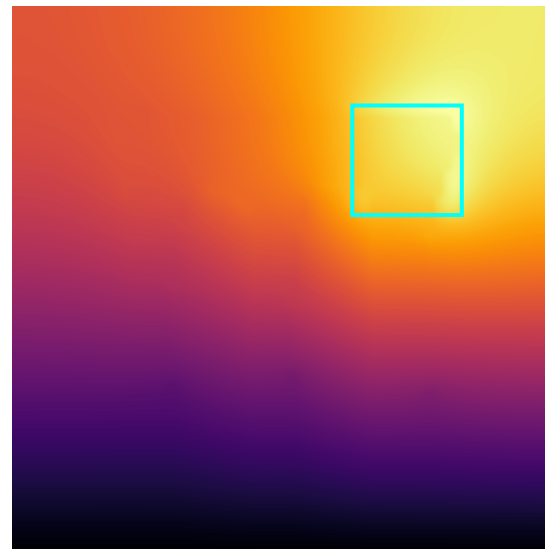

2 Local NCA growth

3 Strict binary design

4 SciPy verification

Best NCA seed

$T_{\max_{256}} = 0.154835$

**6.22% better
than strong tree**

Campaign verdict

**NCA2_NO_GO_EFFECT
2/3 effect passes;
stability gate failed**

Pure NCA can discover a high-performance cooling topology from physics alone

Capacity demonstrated • cross-seed reliability not yet demonstrated • no unseen-layout generalization claim
